

Dividing Fractions - Reciprocal

How to find the reciprocal of a fraction (First two are done as examples)

www.fractionsworksheets.ca

1. To find the reciprocal of a fraction, its numerator and denominator are switched, for example, let's find reciprocal of $\frac{3}{4}$

$$\frac{3}{4} \quad \text{Reciprocal is} = \frac{4}{3}$$

2. $\frac{5}{6} = \frac{6}{5}$

Now you find the reciprocal of fractions from 3 to 10.

3. $\frac{4}{5}$

4. $\frac{3}{8}$

5. $\frac{2}{6}$

6. $\frac{15}{20}$

7. $\frac{30}{25}$

8. $\frac{7}{6}$

9. $\frac{20}{18}$

10. $\frac{25}{30}$
